Excellence in Government Process Re-engineering for Digital Transformation

This award seeks to recognize the projects that involved analysis and re-design of workflow which resulted in improvement in outcomes related to efficiency, effectiveness of process, cost, quality, service delivery or a combination of these. The impact of the re-engineering process should have been a significant digital transformation.

Gold Award

Digital Land (Comprehensive System of Land Management)
Board of Revenue Lucknow, Uttar Pradesh

Silver Award

Khanij Online
Mineral Resources Department, Government of Chhattisgarh

Special Jury Award

IRCTC Rail Connect Mobile App
IRCTC, Government of India

Gold Award

Excellence in Government Process Re-engineering for Digital Transformation

Digital Land (Comprehensive System of Land Management)
Board of Revenue Lucknow, UP

It is an integrated and inter operable solution for extending e-Services related to rural areas of Uttar Pradesh. It comprises of online web applications of Land Records, RCCMS, *Bhu-Naksha* (Digitization of Cadastral Maps), *Khasra*(Crops details), Online Mutation and Anti-Bhu-Mafia Portal.
Key aspects are:

- All 7.65 crore revenue plots of U.P. State have been assigned a unique code of 16 digits. It is mandatory to mention plot code of a disputed plot at the time of filing a case to identify the type of plot.
- Bar Code, QR Code, DSCs, e-Sign, SMS, OTP etc., are being used in all the applications.
- The integration of all related applications is done through exchange of web services. Land records are integrated with banks, land registry, *Bhu-Naksha*, Paddy procurement, Agriculture Census, RCCMS etc.
- Digitally signed and QR code printed Record of Rights are easily available to the citizens through Common Service Centres, Lokwani Kendras, Tehsil Counters. One can view RoR online any time anywhere free of cost.
- Preservation of old *fasli Khataunis* in PDF, DB & e-Book forms.
- The details of all 90,000 out of 1.16 lacs digitized maps of revenue villages are available online.

Beneficiary of the project: Apart from benefiting the general public, it also benefits all rural land owners, all revenue officials and staff of U.P. State, advocates and Litigants. Moreover, it has also benefited the Revenue Department by bringing in ease and efficiency in their working process.

Excellence in Government Process Re-engineering for Digital Transformation

Khanij Online
Mineral Resources Department, Government of Chhattisgarh

Khanij Online as a web-based portal empowers each registered Stakeholder viz.: Lessee, Licensee, traders, End user industry, vehicle owners, and transporters including regulatory Govt. officials to act as a Centre of Delivery. The core objective of this project, is to develop an integrated and effective management of mines and minerals system in the State.

Key features of the project are:

- Online auto-approval for all daily discharges of the mining stakeholders using Digital Signature Certificate.
- Online control on mineral production and dispatch quantities, by auto fetching mining plan and environment clearance figures.
- Single Click online payment for Royalty, DMF, NMET, etc.
- Real-time Assessment with e-wallet facility, Real-time Dispatch Figures, e-Returns
- Online registration for truck Transporter and end user plant, need based report facility.

Beneficiary of the project: Each individual/company/organization as Lessee, Licensee, end user plant, vehicle owner or transporter etc. whoever is related, engaged or interested in any activity concerning mines and minerals in the State of Chhattisgarh as well as the ones beyond borders in other States.

Special Jury Award

Excellence in Government Process Re-engineering for Digital Transformation

IRCTC Rail Connect Mobile App
IRCTC, Government of India

IRCTC launched new IRCTC Rail Connect Mobile App on next generation e-ticketing system in January 2017. The App was re-designed to meet the following objectives:
- For enabling booking of e-Tickets on mobiles anytime-anywhere.
- To achieve objective of Paperless Tickets and ensure future sustainable engagement.
- To enhance the overall booking capacity of e-Ticketing system.
- To remove Technology difference in IRCTC old mobile App and New e-Ticketing website.
- Synchronized ticket booking experience with IRCTC website.

It includes unique features like self-assigned PIN, confirmation probability, support for visually impaired using talk-back, managing master passenger, optional travel insurance service, booking sync between IRCTC website and new mobile app, Last transaction details, change boarding station, booking through IRCTC e-wallet, and VIKALP facility wherein wait listed passengers can opt alternate train for their journey.

Beneficiary of the project: Major beneficiary is the Citizen for whom this app provides a platform for easy and quick booking of tickets along with the option to use new payment modes (BHIM/UPI etc.).

Excellence in providing Citizen-Centric Delivery

This award seeks to recognize the projects which resulted in delivering enhanced values qualitative / quantitative or both to its beneficiaries through effective use of ICT.

Gold Award

UMANG
National e-Governance Division, Ministry of Electronics and Information Technology (MeitY), Government of India

Silver Award

MahaRERA
Maharashtra Real Estate Regulatory Authority, Government of Maharashtra

Silver Award

National Scholarship Portal 2.0
NIC New Delhi

Gold Award

Excellence in providing Citizen-Centric Delivery

UMANG
National e-Governance Division,
Ministry of Electronics and Information Technology (MeitY), Government of India

UMANG is a unified platform to provide major government services. Currently 325 services are live on UMANG and by Dec 2020, 1200 services are planned to be on board.
Key Features:

- It is the only platform providing aggregated Government services to citizens with ease.
- Strong feedback mechanism to take measures of improvement.
- Adopting the latest open source technologies for the development.
- Easy integration with department services provides scalability.
- Doing POC for Artificial Intelligence based Voice Assistant to provide services to non-smart phone users.
- It caters to all user segment across country viz.: Education, Agriculture, Health etc.

UMANG is an online platform having presence on all major mobile platforms such as Android, iOS & Windows as mobile app and on web accessible Pan India from all geographies.

Beneficiary of the Project: This project has benefited the citizens as they need to just download one app to meet different needs. Moreover, through this project NeGD (MeitY) can meet one of its objective of fast tracking mobile governance in country by supporting Central/State Government Departments, Municipalities and their agencies.

Silver Award

Excellence in providing Citizen-Centric Delivery

MahaRERA
Maharashtra Real Estate Regulatory Authority, Government of Maharashtra

MahaRERA is an online application available for customers interested in buying real estate property within Maharashtra. Maharashtra is the pioneer State in implementation of the RERA and has taken the lead in streamlining/making all the services available to the citizens online. All the details about the projects, agents, promoters/builders, workers, contractors, vendors, banks and complaints are available online. It provides financial discipline, transparency, accountability in the real estate sector. For the citizen charter all the services available at MahaRERA are informed on the website of the authority. Project has the details for general citizen including GIS feature for project location and services in surrounding location.

MahaRERA has also established an adjudicating mechanism for speedy dispute redressal regarding registered real estate projects. It has made available the Complaints Module as well as Appellate Tribunal for the Citizen. The grievance redressal mechanism works completely online. As per the Act, 60 days are given for redressal of complaints and appeal. The average of MahaRERA and its Appellate Tribunal for grievance redressal is 47 days and 25 days respectively. MahaRERA has also made available to the public an email id to which people can forward their issues, suggestions and also provide a feedback. This email is monitored on a daily basis.

Beneficiary of the Project: Promoters Associations, Agents' Associations, Consumers' Association and Government Bodies.

Excellence in providing Citizen-Centric Delivery

National Scholarship Portal 2.0
NIC New Delhi

National Scholarship Portal is a pan-India application. The scholarship Portal which is popularly known as 'NSP' caters to the students/beneficiaries from all over India. Annually NSP caters services to more than 1.5 Crore beneficiaries and in its peak time handles 4.5 lakhs applications daily. Students can access the services of NSP through their own devices like personal computer (web based), Mobile (mobile app), etc.

Key features:

1. Scattered information about Scholarship schemes now being aggregated at a single platform across the country.
2. The earlier lengthy, cumbersome and paper-based forms have been replaced now by uniform, user-friendly and digital forms.
3. Tracking of application was almost impossible earlier, whereas now applicant is informed of application status at each stage
4. Average scholarship processing time of 18 months earlier has now been reduced to less than 6 months

Beneficiary of the project: Two main beneficiaries of the project are
I. Students (ultimate beneficiary of the Schemes)
II. Institute (School/ College / Universities/ Academic Institutions)

i. North-East States

Hello Doctor-"555"
Office of District Magistrate Tehri Garhwal, Uttarakhand

Effective use of ICT Infrastructure for seamless delivery of health care service through Hello Doctor-"555".
Method adopted for seamless delivery of Services:

- Two healthcare experts (Pharmacist at sub center and Doctor at District Hospital) discuss a patient using conferencing system.
- District Health Society (DHS) for analyzing feedback of patients.
- Continuous monitoring of service using inspection and review meeting by dedicated team.

In comparison to traditional health service, benefits of "555" service:

1. Service access point is localized at block level in sub centers. It reduces constraints of terrain and topography.
2. Minimal or Zero Cost to Citizen. It reduces travelling cost along with high physical and emotional cost involved.
3. Reduction in travel time and distance to avail health service.
4. Real time service delivery.
5. Easy and universal access to doctor's prescription and laboratory and diagnostics reports.
6. Feedback and Grievance Redressal Systems in one place.

Beneficiary of the project: Major beneficiaries are the patients of the hilly areas, health workers (Doctors, Pharmacist, ANMs, ASHA workers, NGO (Sathi Sehat), Health Experts) and Administrative Staff (Gram Pradhans, Ward members etc.).

Gold Award

Excellence in District level initiative in e-Governance i. North-East States + Hilly States ii. UTs (including Delhi) iii. Other States

iii. Other States
Punarvas
Srikakulam District Administration, Government of Andhra Pradesh

Punarvas was launched to create trust amongst the people for land alienation, acquisition, SIA, R&R, etc by making it online. Almost complete information on each beneficiary and each transaction is being maintained in the database.

Innovative usage of ICT for process change to improve quality of the life/ organizational effectiveness:
- Cartosat -2 and GIS mapped drones from NRSC/ APSAC
- Aadhar based biometric authentication through USB 2.0 based Finger print devices
- NEFT based digital CBS banking transactions
- LARR processes were designed right from SIA to LA/ R&R awards and integrated into one application.
- Aadhar based biometric authentication of the beneficiaries and individualist profiling of entitlements and compensation
- Logic to limit the extents and payment particulars and to enforce the entitlements as per state acts
- Tab / Mobile version of the software for conducting surveys/ door to door evaluation and to capture various details from the field
- District level initiative immediately adopted to other projects in the state

Beneficiary of the project: Land Acquisition and R&R Authority, Project Displaced families and Government of India

Outstanding research on Citizen Centric Services by Academic/Research Institutions

This award seeks to recognize the exemplary research in the field of eGovernance by Academic/Research Institutions for the benefit of the citizen.

Gold Award

Wind power forecasting services for the Whole state of Tamil Nadu
National Institute of Wind Energy
Ministry of New and Renewable Energy, Government of India

Silver Award

Targeted Intervention to Expand and Strengthen TB Control among the Tribal Populations under RNTCP, India

National JALMA Institute for Leprosy and Other Mycobacterial Diseases, Department of Health Research, Ministry of Health & Family Welfare (MoH&FW), Government of India

Gold Award

Outstanding research on Citizen Centric Services by Academic/Research Institutions

Wind power forecasting services for the Whole state of Tamil Nadu
National Institute of Wind Energy
Ministry of New and Renewable Energy, Government of India.

A model for the forecasting of renewable energy, especially wind for load management. The project has developed a research-based model for prediction of wind forecasting and uses algorithms in the background. NIWE has created a state of art in house developed wind power forecasting model to forecast the wind power. In Tamil Nadu due to NIWE's forecast, evacuation of wind generation has been improved from 80 Million Units to 100+ Million Units in a day.

Key Innovation and Emerging Tech:
- National Institute of Wind Energy gets data from National Centre for Medium-Range Weather Research Forecasting (NCMRWF) and ISRO – Space Application Centre (ISRO-SAC) for developing the Indigenous wind power-forecasting model using the Indian Numerical Weather Prediction (NWP) data.
- Presently, NCMRWF is providing hourly wind speed forecast for 7 days in advance
- In addition, NIWE is also receiving 5 km (Regional Model) horizontal resolution NWP data for whole country. ISRO-SAC is providing 15 minutes wind speed forecast up to 72 hours ahead.
- The project employs Data Analysis & Modelling and GIS.

Beneficiary of the project: Electricity Consumers, Environment.

Silver Award

Outstanding research on Citizen Centric Services by Academic/Research Institutions

Targeted Intervention to Expand and Strengthen TB Control among the Tribal Populations under RNTCP, India
National JALMA Institute for Leprosy and Other Mycobacterial Diseases, Department of Health Research, Ministry of Health & Family Welfare (MoH&FW), Government of India

A tribal population of 17 million is being covered by the project in 17 districts of 5 States, namely, Rajasthan, Jharkhand, Madhya Pradesh, Chhattisgarh and Gujarat. 35 Mobile TB Diagnostic Vans (MTDV) have been deployed in these States which go to the remote villages and offer diagnostic services for TB in the village itself. Under this project, real-time data was collected on TB Life Cycle for more than 4000 Tuberculosis patients which enabled planning of services from a Mobile TB Diagnostic Van and community awareness, private practitioner sensitization and other such activities. Additionally, the software helped in ensuring treatment of patients diagnosed from the Mobile TB Diagnostic Van.

Outcomes of the Project:
- Increase in case detection of TB patients under the RNTCP
- Improvement in treatment adherence
- Increased community involvement
- Increased traditional healer involvement
- Improvement in community awareness
- Improved convenience to TB patients for diagnosis as well as for treatment.

Beneficiary of the Project: Tribal Population, Doctors.

Excellence in adopting emerging technologies

This award seeks to recognize the exemplary adoption of emerging technologies (such as block chain, artificial intelligence, machine learning, natural language processing etc.) for e-Governance projects.

Gold Award

Ultra resolution UAV based Geo-ICT enabled Property Tax Management System for Municipal Area of Bhiwani
District Administration Bhiwani

Silver Award

iStart Rajasthan
Department of Information Technology & Communication, Government of Rajasthan

Gold Award

Excellence in adopting emerging technologies

Ultra resolution UAV based Geo-ICT enabled Property Tax Management System for Municipal Area of Bhiwani
District Administration Bhiwani

The MCB implemented a new GIS enabled property tax system developed by the Haryana Space Applications Centre, Department of Science and Technology. The project had the objectives of Unmanned Aerial Vehicle (UAV)/ Drone based aerial mapping for the Municipal Area of Bhiwani and utilizing the feature extracted output as the base for the fresh property tax survey.

An Unmanned Aerial Vehicle (UAV) driven image was captured for the entire area under the jurisdiction of the civic body. This image was geo-referenced to convert image into map of the entire civic body. The digitization of this map with a very high resolution of 5 cm enabled automated assessment of dimension of the area of each and every property with in municipal area.

A smartphone based application was used to verify the assessments made using UAV based maps. This Geo-enabled system enabled MCB officials to assess property taxes, monitor defaults, authenticate the information and finally, to redress grievances

Beneficiary of the project: The beneficiaries are the Citizen and the Municipal Corporation as this has enabled transparency in the property tax calculation and collection.
