| Project id - | NAeG/14-15/00125 |
| Name of The Project | Village integrated Monitoring System (VIMS) |
| Category of Award Applying for | Excellence in Government Process Re-engineering |
| Date of Launch | 04-03-2013 |
| Summary/Objective of the project | <p>VIMS is designed as tool for effective monitoring workwise, scheme wise, year wise, village wise, block wise and even officer wise. The rural development projects are minor in nature, but numerous and scattered in vast area and most important is that they are executed by different gram panchayat, with limited field functionaries It becomes difficult to regular supervise each and every project. Moreover reporting system of such projects are not accurate and fudged figures are provided many times by officials which leads ineffective monitoring. With the help of VIMS monitoring of each and every project, during time of execution become possible. VIMS is preventive in nature, it checks & stop the gram panchayats from making financial irregularities during time of execution. MOU with banks to upload expenditure & concerned resolution. Every project to have a unique code. e-Document keeper for administrative approval, technical approval, estimates, panchayat resolution, utilization certificates and photographs etc. To check performance of each & every field functionary . Regular SMS are made to field functionary for delay and pendencies. This tools forces the field functionaries to perform their duties in prescribed time period. e-Document generator cash book & sub cash book. Utilization certificates are automatically generated once the work is completed. To monitor work with the help of individual photographs (mobile application to upload photographs for the software). To tie-up with banks for rear time monitoring. Helps to execute govt. policies in true letter and sprits. Enhance transparency and facilitate RTIs. Multiple reporting system. Reduce work load of field functionaries. Quick complaint disposal.</p> |
